

Ferizwan Malik Wichaksana

Bogor, Indonesia | +62 87784889511 | ferizmalik12@gmail.com

PROFILE

Software Engineering student at IPB University with experience in web and mobile application development, UI/UX design, data analyst and technology related projects. Able to work effectively in teams, solve problems, and adapt to new challenges. Gained practical experience through internships, international programs, and various software development projects. Passionate about frontend development and data analytics.

EDUCATION

IPB University

Faculty of Vocational

Majoring in Software Engineering

Cumulative GPA: 3.7/4.0

Bogor, West Java
Expected to graduate 2027

Vocational High School 3 Bogor

Majoring in Computer and Network Engineering

Bogor, West Java
2020-2023

EXPERIENCE

Guangdong Construction Polytechnic

Student Exchange

Guangzhou
Oct 2025 – Nov 2025

- Completed 5 multidisciplinary courses covering Data Analysis and Visualization, Motion Graphic Design, 3D Modeling, Drone Technology, and Chinese Culture & Language.
- Applied analytical techniques and data visualization principles to transform data into meaningful insights and visual narratives.
- Developed digital creative assets through motion graphics and 3D modeling projects using professional design methodologies.
- Gained hands on exposure to drone operations, applications, and flight demonstrations in practical learning sessions.
- Collaborated with lecturers and students in an international academic environment over a 1 month exchange program.

PT Bonet Utama

Internship

Bogor
Jan 2022 – Jul 2022

- Configured and deployed more than 10 network devices, including routers, switches, cctv and wireless access points for operational and client environments.
- Supported network infrastructure across 3 client sites, including SMAN 5 Bogor, Panasonic, and Kecamatan Bogor Tengah.
- Assisted in maintaining and monitoring 1 production server to ensure stable system performance and service availability.
- Implemented DNS configurations, IP addressing schemes, and network connectivity settings to support daily operations.

PROJECT

SACAR (App Smart Agriculture Augmented Reality)

AR Developer & UI/UX Designer

Jun 2026

- Developed an Android-based augmented reality application to introduce smart agriculture technologies through interactive 3D visualization and gamified learning experiences.
- Designed intuitive UI/UX and implemented AR features using Unity, Vuforia Engine, C#, Blender, and Figma.

Subway Surfers Pose Detection (Game Website)

Machine Learning & Computer Vision Developer

May 2026

- Developed a real-time body gesture recognition system to control Subway Surfers using MediaPipe Pose and an LSTM deep learning model.
- Built an end-to-end machine learning pipeline and achieved 99.78% test accuracy using Python, TensorFlow, OpenCV, and Flask.

Data Science Salary Prediction (Python Program)

Data Scientist

May 2026

- Developed an end-to-end salary prediction model using 151,445 job records through data preprocessing, feature engineering, and regression modeling.
- Built and evaluated Linear Regression and Random Forest models using Python, Scikit-learn, Pandas, and Matplotlib.

Airbnb Price Prediction (Python Program)

Data Scientist

Apr 2026

- Developed predictive models to estimate Airbnb listing prices through exploratory data analysis, feature engineering, and machine learning techniques.
- Applied the CRISP-DM methodology using Apache Spark, Python, Scikit-learn, Pandas, and Power BI to generate business insights.

Abon Murnisaji (E-Commerce Website)

Frontend Developer & UI/UX Designer

Mar 2026

- Designed and developed a complete e-commerce platform featuring payment, shopping cart, order management, customer reviews, and authentication modules.
- Built responsive user interfaces and high-fidelity prototypes using Laravel, PHP, JavaScript, Tailwind CSS, MySQL, and Figma.

Puncak Tennis Club (Booking Website)

Frontend Developer & UI/UX Designer

Dec 2025

- Designed and developed a web-based tennis coaching reservation platform with online booking, schedule management, and user authentication.
- Implemented responsive user interfaces and interactive prototypes using Laravel, PHP, JavaScript, Tailwind CSS, MySQL, and Figma.

Nasi Kebuli Mutiara (Ecommerce Website)

Frontend Developer & UI/UX Designer

May 2025

- Developed a responsive online food ordering platform featuring product catalog, shopping cart, and order management functionalities.
- Designed intuitive user interfaces and optimized customer journeys using React.JS, MySQL, and Figma.

Bettabeal (Ecommerce Apps and Website)

Frontend Developer & UI/UX Designer

Nov 2024

- Designed and developed web and mobile e-commerce platforms for betta fish with product catalog, transactions, and account management features.
- Created engaging UI/UX for marketplace and educational content using Next.JS, JavaScript, MySQL, Flutter and Figma.

ADDITIONAL

Skills

- Programming Languages: JavaScript, PHP, Python, R, SQL
- Tools: React.js, Next.js, Laravel, Tailwind CSS, Bootstrap, MySQL, MongoDB, Git, GitHub, Visual Studio Code, Android Studio, Figma, Adobe Premiere Pro, Adobe After Effects, Adobe Illustrator, Power BI, Google Colab, RStudio, QGIS, Postman

Publications

- "Analisis Fungsional Website Komunitani Menggunakan Pengujian Black-Box Dengan Teknik Decision Table." Jurnal Aplikasi Teknologi Informasi dan Manajemen (JATIM), Vol. 7, No. 1.
